# C15-20s

IC-PNEUMATIC LPG/DIESEL (1500 / 1800 / 2000 kg) 3000 / 3500 / 4000 lbs.

C15C-C20sC

IC-CUSHION LPG (1500 / 1800 / 2000 kg) 3000 / 3500 / 4000 lbs.

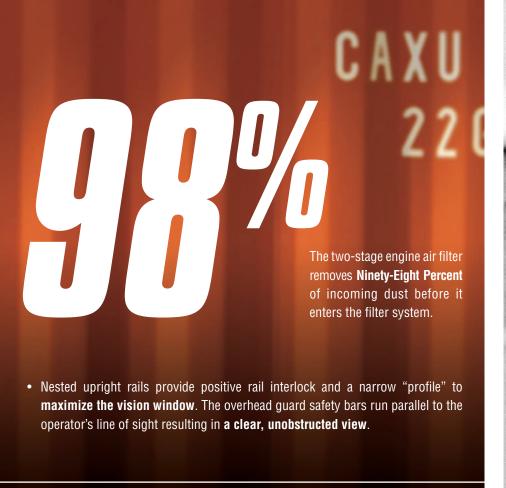

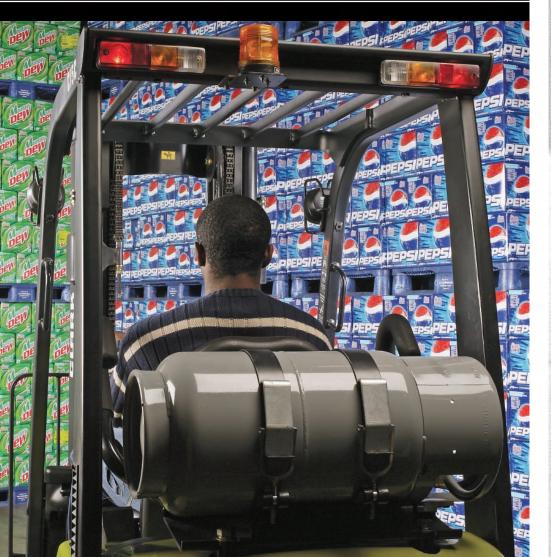

## Highly Maneuverable, Easily Serviceable, Broadly Flexible, Extremely Dependable

The GEN2 C15-20s and C15C-20sC Series proudly adds to CLARK's unique history of building the best forklifts with evolutionary steps in **ergonomics**, **power**, **safety**, **durability** and **performance**. These narrow-width models, designed for distribution, manufacturing and warehousing of all types, are suited for the toughest applications.

# Maximum Visibility + Minimum Fatigue = Ultimate Safety & Maximum productivity

## Rugged Durability, High Performance, Extreme Environments, Demanding Applications

The GEN2 series is designed to tackle any task placed in its path. The open-core, plate-fin radiator provides **maximum** cooling of the engine, transmission and axle in the harshest environments and the most demanding applications.

# Safety

All CLARK forklifts, associated

CAXU

devices and tools are in conformance to CE, ANSIASME, OSHA and UL regulations.

- Start in neutral: If the Gear lever is not positioned in neutral, the engine will not start.
- Tilt Lock Valve: Prevents the accidental forward tilting of the mast while engine is switched off.
- · Gas Cylinder with Automatic Lock: Prevents accidental closure of hood.
- Safety valve: Prevents accidental uncontrolled lowering in the event of oil pressure hose damage.
- Forward and reverse travel is not possible whilst the parking brake is in the on position.

# Smooth Control + Easy Operation = Operator Confidence & Optimum Comfort

## C15-20s / C15C-C20sC STANDARD FEATURES & BENEFITS

#### **PARKING BRAKE**

#### Simple & Error Proof

- Foot-applied brake can be released by hand or foot.
- Transmission disengages when parking brake is set preventing driving against brakes.
- Horn will sound if brake is not set after 3 seconds from when the engine is shut off.

### **HYDRAULIC SYSTEM**

#### Maximum Horsepower

 Uses a load-sensing flow control valve for steering to reduce horsepower loss and heat buildup.

#### Optimum Performance Of Attachments

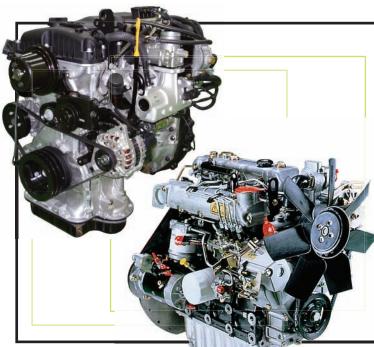

• The main hydraulic valve incorporates adjustable flow controls for tilt and auxiliary functions.

#### Sectional Design

 Allows for easy addition of extra functions and simplifies service.

#### Upright Mounted Load Lowering Valve

• Controlled lowering speed independent engine speed.

#### THE POWER BEHIND THE PUNCH

#### LPG engine

- field-proven 2,0L Mitsubishi LPG engine
- with counter-rotating dynamic balancers for smooth, quiet operation.
- proven components in a simple system using automotive style malfunction
- light and fault codes for diagnosis and maintenance

#### Recognized Worldwide Yanmar Diesel Engine

- Durable, easy to start, low-smoke, easy to service.
- High pressure indirect-injection = better fuel economy.
- Vertical exhaust is standard equipment.

#### CE Compliant

• Engines meet reduced emission and smoke levels.

#### **Available Equipment**

- Mirrors
- Sideshifters
- · Strobe lights
- Backup alarm
- Rear work light
- Auxiliary valves
- Hose adaptations
- Fork Positioner
- Orange seat belt
- High Termination
- · Quick Couplings
- · Optional Colour

- · Tire options
- · Convenience console
- · Air cleaner safety element
- Pre-cleaner, overhead guard mounted
- U.L. Type LPS construction
- · Suspension seat, vinyl and cloth
- · Reduced height overhead guard
- Swing-down LPG tank bracket
- HMC 2.4 L LPG engine with EPA Class 4 incl. catalyst

#### **ONE-PIECE FRAME**

- Heavy duty, welded, and formed steel plate design protects from impact damage and extends the life of the truck.
- An integral hydraulic sump, with remote breather provides cooling for hydraulics in tough applications.

#### STEERING AXLE (pneumatic shown)

#### Rugged Design

 Linkage pivot pins have a "double shear" design to withstand impact without loosening or breaking.

#### Simple Axle Design

· Double-acting cylinder provides steering force.

#### **RUGGED UPRIGHT AND CARRIAGE**

#### I-Beam style upright

- Maximizes visibility and strength, allows for internal hosing and cable.
- Six carriage rollers and two side-thrust rollers minimize deflection and sideplay, reduce roller contact stress and extend component life.
- Hydraulic cushioning valves provide silent staging of the rails to reduce shock during both lifting and lowering.

#### Shimmable, Sealed & Canted Load Rollers

• Maximize Load Distribution & Reduce Free Play.

#### **DASH DISPLAY**

#### Microprocessor

- Monitors the condition of truck systems as well as controlling their functions.
- Controls neutral starting and prevents cranking while the engine is running.

#### Gauges

- Engine coolant temperature.
- Fuel level for Diesel.

#### LCD Display

 Hourmeter and maintenance interval are displayed on the LCD screen.

#### LED Lights Indicate

- High transmission temperature Low engine oil pressure
- · Alternator charge · Fuel system malfunction
- Park brake applied Maintenance required Seat belt

#### Push Switches

 Headlight and optional worklights are controlled with push switches.

#### **OPERATOR COMPARTMENT**

#### Optional Fully Adjustable Seat

- 6cm (2.4") Vertical Travel 20° Backrest Adjustment Range
- 15cm (6") fore / aft adjustment Contoured for support
- · Non-pinching, Retractable Seat Belt

#### Thick Molded Floor Mat

- · Reduces vibration and noise level.
- Improves operator comfort.

#### Minimal Arm Fatigue

• Electronic directional controls enable true fingertip operation.

#### Tilt Steering Column

Adjusts to Suit Operator & Easier Entry/Exit.
